

North Carolina Cyber Academy (NCCA), a virtual school serving students throughout the state of North Carolina, is currently seeking to contract with experienced NC DPI certified school psychologists who are able to conduct in person testing at various locations (near their homes) throughout the state of North Carolina. Pay is highly competitive. Testing schedules are independently managed and flexible, and can include during the day, after school hours, as well as Saturday testing. This is a great opportunity for school psychologists to earn additional income. If interested, or if you have additional questions, contact Maggie Bush, Director of Student Services at mbush@myncca.com or at 984-208-7125.
