

North Carolina Cyber Academy, a **virtual** public charter school serving approximately 3000 students throughout the state of North Carolina, is currently seeking a school psychologist to add to our Student Support Team.

NCCA currently partners with an outside agency to conduct in person psychoeducational testing. This unique position will be responsible for helping coordinate these contract testing services and will assist IEP teams with interpreting test results. Further, this position will also support the completion of some evaluation components virtually when deemed ethical and appropriate. Other position responsibilities include consultation, serving on our Mental Health Team, supporting MTSS implementation, and individual and group counseling.

NCCA highly values work-life balance. Besides being able to work from home and create your own schedule, there are no after school meetings, morning duties, or excessive demands on your time outside of school hours. NCCA follows the state salary schedule for school psychologists and provides a competitive supplement. Benefits, to include health and dental insurance, are available for full-time employees. More information about the position can be found at <https://www.myncca.com/careers>. For additional questions, contact Maggie Bush at [mbush@myncca.com](mailto:mbush@myncca.com).
